

## Smart mirror

FOR RESIDENTIAL & MODERATE COMMERCIAL USE

smart  
mirror

Every device today seems to have a 'smart' version of it. There are smart watches, smart TVs, smart fridges, smart speakers, and even smart lights. Let's have a look at an interesting smart device, the smart mirror

### What Can A Smart Mirror Do?

What makes a Smart Mirror 'smart' is the ability to display any information you want on it. A smart mirror can be customized to display local weather forecasts, news bulletins, your upcoming

calendar schedule, social media feeds, etc.

It's possible to even add voice commands using Amazon's Alexa or Google's Home Assistant. With voice commands you can ask your mirror questions, set reminders, or control other smart devices in your home.

As an example of what a smart mirror can do, this is what mine displays when I walk into my bathroom:

- Current day, date and time
- Current weather and forecast for the week
- Satire news feed headlines
- My Google calendar

### Smart Mirror Features

The great thing about building your own smart mirror is you can customize it to your own needs.

Here are some ideas of different features you could include in your smart mirror:

**Touch screen:** adding touch to your smart mirror let's you interact with it

**LED lighting:** a simple LED strip around your smart mirror can add some nice feature lighting to your room

**Motion sensor:** turn your smart mirror on automatically when you enter your room

**Voice control:** ask your mirror questions or give it commands

**Facial recognition:** your mirror can detect who is in the room and customize the content to match each person
